New Project Issue View / Side Bar / Quick Switch Between Issue and Search Page

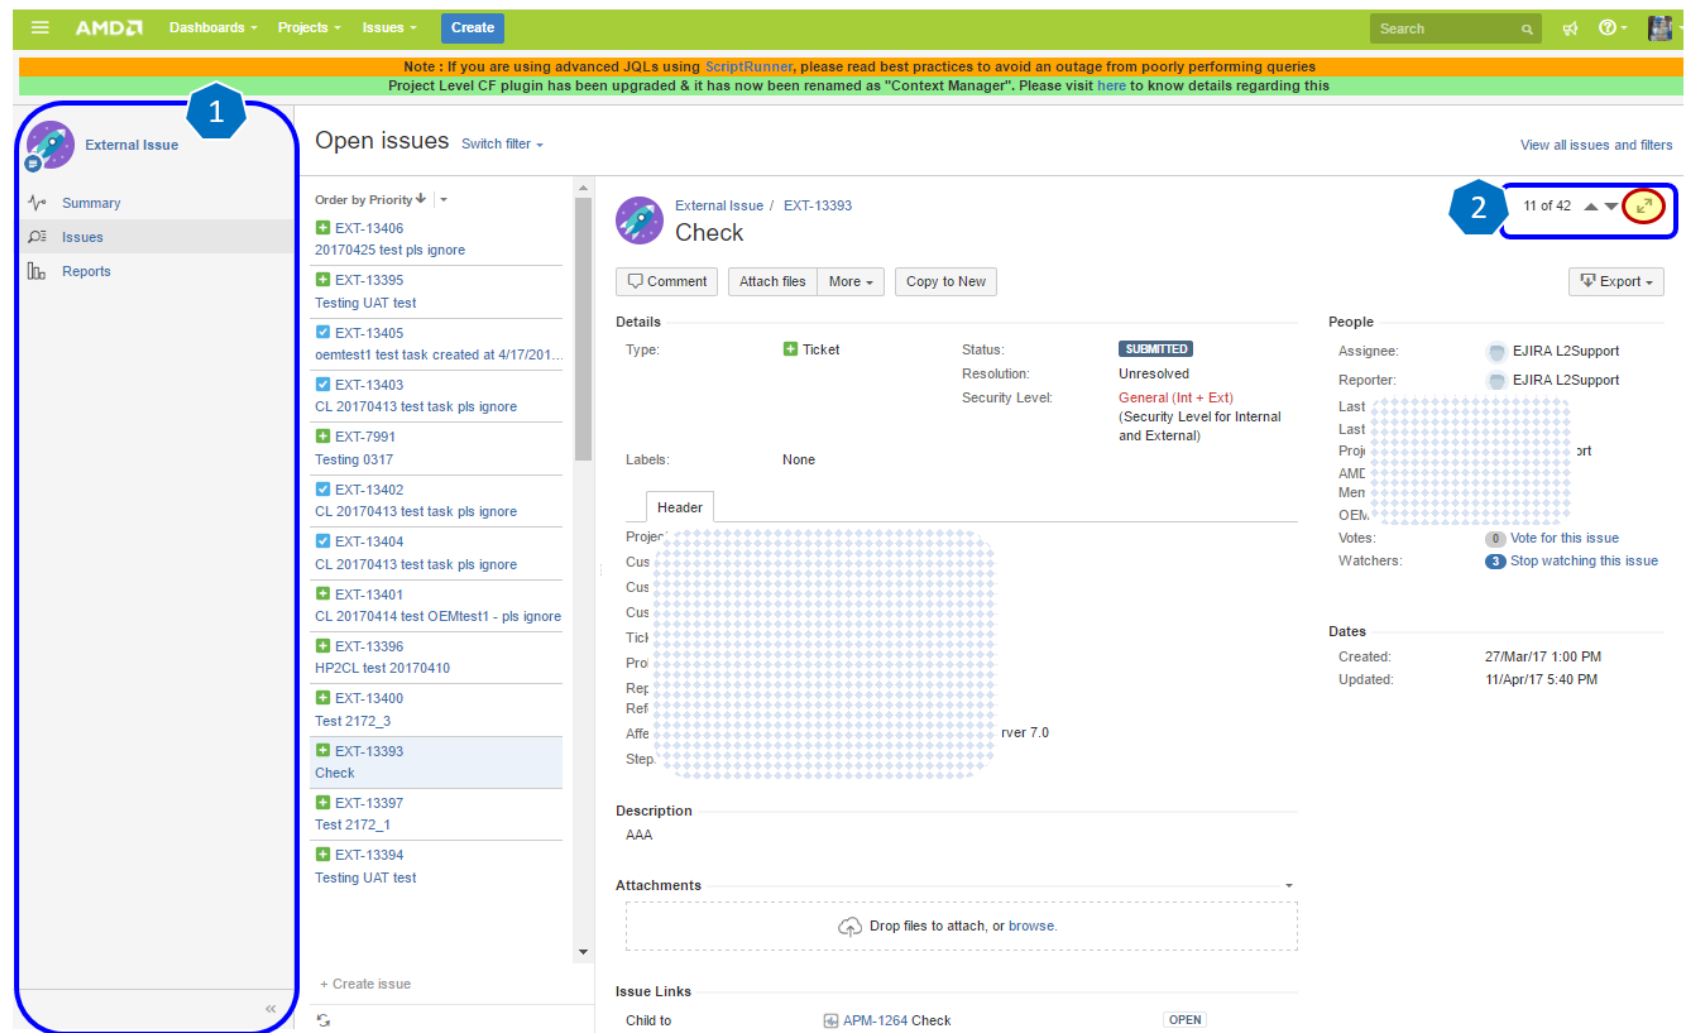

JIRA 7.2 provides an Updated Project Issue View.

1. The new "project issue view" for JIRA Core gives you an expanded view of any issue from within a project in the left side bar. You can easily go to the **Summary** to view the activity stream, or **Issues** to Search and access built-in Reports for the current project.
2. You can easily switch between the specific issue view page and the overall list of "Open Issues" in the same project on the issue navigation page.

- Click  in the right upper corner.

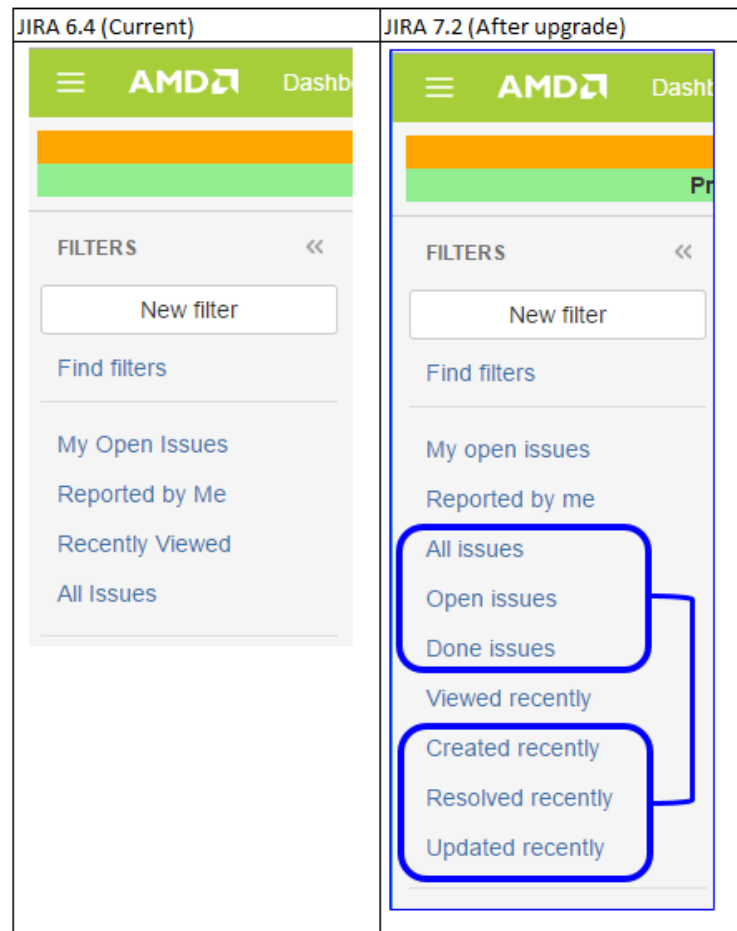

The target issue displays on the **Open issues** page:

- Click  in the right upper corner to switch back to issue view page.

New built-in JQL searches

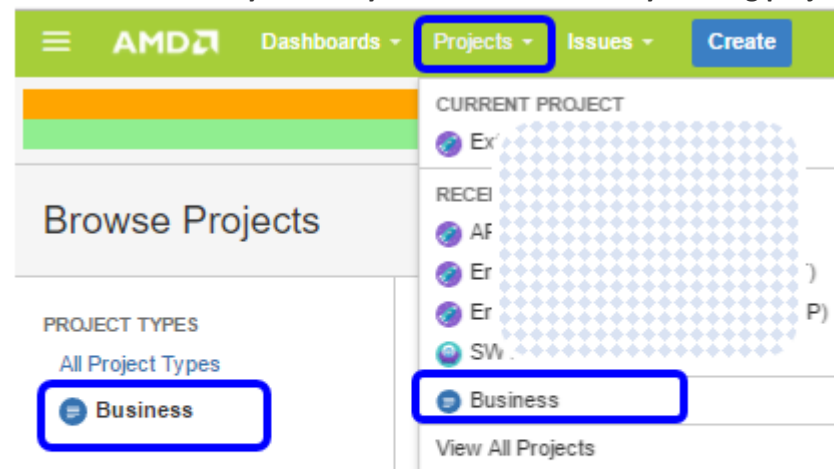

[Open issues](#)
[Done issues](#)
[Viewed recently](#) (filter name change, in 6.4 it's called Recently Viewed)
[Created recently](#)
[Resolved recently](#)
[Updated recently](#)

5 New property

New Property in Project

JIRA 7.2 introduces a new property, **Project Types**. By default, all the projects in external JIRA are the project type: **Business**. Please note this is for the JIRA system only and will not affect any existing project security, accessibility, or functionality.

Note : If you are using advanced JQLs using ScriptRunner, please read best practices to avoid issues. Project Level CF plugin has been upgraded & it has now been renamed as "Context Manager"
